PROFESSIONAL EXPERIENCE

Proxym IT   **Tunisia, Sousse**
Software Developer Intern   Feb 2024 – June 2024
- Design and Develop a Crowdfunding platform for startups, which creates a new channel for startups to pitch their ideas and look for investments, and investors can invest on the platform.

- Utilized a tech stack including React, React Native, NestJS, PostgreSQL, Docker, Azure, DialogFlow, and Redis to enhance platform functionality, leading to improved system performance and scalability

PERSONAL PROJECTS

URL Shortener(View Project)   **Nov 2024**
- An URL Shortener Project for my university club Google Developer Groups on Campus ISSAT Sousse to share links professionally.

Delify Discord Bot (Github Repo)   **Jan 2022**
- A discord bot made to serve some functionalities such as playing music and creating playlists made with JDA (Java Discord API).

Mr.Labloub (Demo Video)   **Apr 2023**
- A Unity game I developed called "Mr.Labloub" for a university project, where you collect garbage and plant trees in an attempt to spread awareness to preserve our planet .

Task Flow (Github Repo) (Demo Video)
- An android application provides a user-friendly interface for managing tasks   **Dec 2023**
